DISCUSSION

Staff requested that this Study Session be held in order for the Planning Commission to have an introduction to the project, which includes a Specific Plan, Development Agreement, and Addendum to the Environmental Impact Report. The presentation will include an explanation of the purpose of each document, how it will be used by the Skyborne Project, and distribution of the documents to the Commission. Distributing these documents early will give the Commission more time to review them before the October 13, 2015 Planning Commission Meeting.
