Prevent unauthorized people from entering buildings or rooms with a keyless access control system that only unlocks when it recognizes an authorized user's driver's license, credit card, ATM card or any other card with a magnetic stripe! Up to 100 authorized users (expandable to 1,000) can unlock the door with a single swipe of a pre-designated card. No keys or PINs required! Rated for over one million card swipes

The system is perfect for protecting homes, businesses or institutional buildings (i.e. clinics, schools, museums, etc.). It installs onto any door equipped with an electromagnetic lock or doorstrike (sold separately).

Programming individual cards takes just seconds! You can also de-activate cards just as fast, in the event an authorized user loses a card, or if you decide to deny access at a later date (i.e. a fired employee).

The length of time you want the door to remain unlocked after a successful swipe is adjustable (anywhere from 0.5 to 5,000 seconds). You can also choose how the system responds in the event of a power outage: fail safe (unlocked when power is removed) or fail secure (locked when power is removed). EEPROM memory retains all programming and card data when the unit is not powered.

The Magnetic Card Reader requires 12VAC or 12VDC and comes with 10 ft. of black, white, gray twin flex cable, and enough supplies to program 100 cards. To control higher current loads (beyond the 1/2 amp the controller can directly control), use the #7278 Single Relay Board, which handles up to 10 amps at 125VAC.

Fully waterproof and backed by a 2-year manufacturer's warranty. Compatible with any standard Track II magstripe card. Works with all 12V doorstrikes and deadbolts offered by SmartHome (doorstrikes and deadbolts sold separately).

Product Overview

The global door controls TH1100EDTBARF fire rated touch/panic bar is 36 in. long and comes in an aluminum finish. The exit device is suitable for all doors (aluminum, hollow metal, or wood) where there is no projection on the face. Manufactured of extruded anodized aluminum and stainless steel springs, it is durable enough for the most demanding applications and is a fire rated device. A rim cylinder is not included.

- Rating: fire-rated
- Latch: stainless steel, 3/4 in. throw-5/8 in. dead latch
- Backset: 2-3/4 in., includes latch and strike filter plates
- Strike: surface mounted for 5/8 in. stop with shim
- Handing: reversible, non-handed
- Door width: 36 in., can be field sized to 30 in.
- Mounting height, recommended installation at 41 in. from finished floor to center of push rail
- Fasteners furnished with sheet metal and machine screws
- Door width: 1-3/4 in. standard
- UL R25621
