

REPORT TO THE PLANNING COMMISSION

DATE: July 11, 2017

TITLE: Conditional Use Permit No. 17-17, Development Agreement No. 16-17, and Tentative Parcel Map No. 37158. Proposing the development of various medicinal marijuana structures totaling approximately 219,000 square feet (SF) on a portion of the 161 acre site. The project is located on the east side of Indian Canyon Drive between 18th and 19th Avenues in the I-L (Light Industrial) zone. Applicant: Kenny Dickerson, Coachillin' Holdings, LLC

Prepared by: Benjamin Torres, Associate Planner

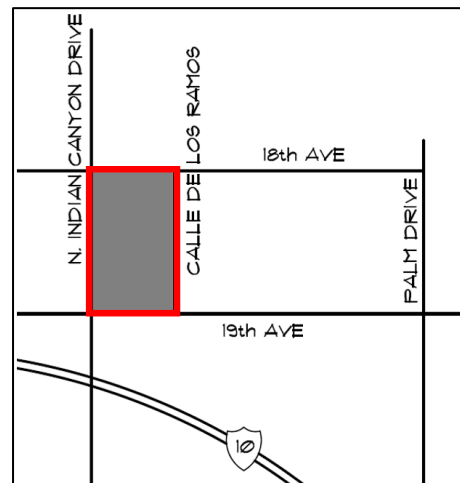

Reviewed by: Daniel Porras, Community Development Director

RECOMMENDATION

- 1) Staff Report;
- 2) Entertain Questions of Staff from Planning Commission;
- 3) Open the Public Hearing;
- 4) Take Testimony from Applicant;
- 5) Take Public Testimony;
- 6) Opportunity for Applicant Rebuttal;
- 7) Close the Public Hearing;
- 8) Planning Commission discussion and questions to Staff; and
- 9) Consider a motion that the Planning Commission recommends approval to City Council of the following: (1) a Mitigated Negative Declaration for the Coachillin' Cultivation project; and (2) Conditional Use Permit No. 17-17; (3) Development Agreement No. 16-17; and (4) Tentative Parcel Map No. 37158; for the development of various medicinal marijuana structures totaling approximately 219,000 square feet in the I-L (Light Industrial) District. APN 666-340-004, -006.

EXECUTIVE SUMMARY

The applicant, *Coachillin' Holdings, LLC*, has filed a Conditional Use Permit (CUP), Tentative Parcel Map (TPM), and Development Agreement (DA) application for the construction of a new medical marijuana testing/processing facility and temporary cultivation facilities on a 11.94-acre site located on the southeast corner of Blue Dream Crossing and Coachillin' Way. The development will consist of a permanent 40,630 square foot lab facility structure, with 178,600 square feet for temporary prefabricated medicinal marijuana cultivation facilities. Street improvements, on-site parking, and landscaping are also proposed. The entire TPM project site will be secured by wrought iron and tan precision block wall perimeter fencing. Construction is proposed in one (1) phase.

BACKGROUND

The applicant has filed applications for a Conditional Use Permit, Development Agreement, Tentative Parcel Map. specific plan, general plan amendment

SITE CONDITIONS

Existing Zoning/General Plan Land Use:	I-L (Light Industrial)
Existing Use:	Vacant Land
Total Project Area:	11.94 gross acres (CUP) 153.71 gross acres (TPM)
Assessor's Parcel Number:	666-340-004, -006

The approximately 12-acre CUP project site contains slight to moderate amounts of typical desert vegetation (scrub brush and low-lying plants). A part of the site was graded without obtaining City approval and contains no native vegetation. The CUP project site has no street improvements and is currently an unimproved gravel road provides access to the project site.

Surrounding properties for the TPM consist of:

<u>Direction</u>	<u>Jurisdiction</u>	<u>Zoning & General Plan Designations</u>	<u>Current Land Use</u>
North	County	Residential	Residential Uses & Vacant Land
West	City of Palm Springs	Manufacturing Zone	Vacant Land
South	City	IL (Light Industrial) District	Industrial Uses & Vacant Land
East	City	IL (Light Industrial) District	Vacant Land

The CUP project site is surrounded by Light Industrial zoning designations and vacant land in all directions.

TENTATIVE PARCEL MAP (TPM)

TPM No. 37158 proposes to subdivide 153.71 gross acres into 43 parcels. In addition to creating 13 lettered lots for street purposes and 3 parcels designated as retention basins. The CUP project site is located within parcels 32 and 33 of the TPM. The overall TPM will be used for the future development of the Coachillin Specific Plan, which is currently being reviewed by staff.

CUP ANALYSIS

General Plan and Zoning Consistency

The project proposes to establish a Medical Marijuana Cultivation and Testing/Processing Facilities in accordance with Section 17.180 of the DHSMC, which allows these uses with approval of a CUP and Regulatory Permit. The proposed development will be consistent with zoning development standards and all applicable General Plan policies following the Conditions of Approval.

Site Coverage

The CUP project site consists of 11.94 gross acres in size. Under the Industrial Zoning District standards, the maximum allowable coverage is 75%. The total of the proposed building lot coverage (Ground Floor Area) is 219,310 square feet, or 42% of the project site, placing the project, within the maximum allowed coverage.

Building Height

The highest point structure will be the permanent lab facility at 22 feet above adjacent grade. This is below the maximum height of 50 feet allowed in the IL District. The high of the various temporary structures range from 15 to 19 feet.

Building Setbacks

The minimum setbacks in the City's Industrial Zoning Districts are 20 feet in front and 10 feet in the rear. A minimum setback of 10 feet is required for side yard unless if attached buildings are proposed in which case no side yard setback would be required for the attached side as per section 17.16.030 of the DHSMC. The proposed permanent and temporary buildings meet all of the minimum setback requirements.

Circulation and Parking

Ingress and egress to the site will be provided from two driveways, located on the north and west side of the project site.

Off-Street parking standards for Medical Marijuana Cultivation uses are not specifically defined in the City Zoning Code. Therefore, Staff has applied parking ratios for similar uses including Office (1 space per 250 square feet), industrial (1 space per 750 square feet) and plant nurseries (1 space per 2,500 square feet), resulting in a requirement of 170 total parking spaces. The proposed site improvements will provide 164 parking stalls, resulting in a need for 6 parking stalls. Section 17.120 of the Desert Hot Springs Municipal Code allows Staff to grant the applicant a minor modification up to a 10% maximum for on-site parking standards. Staff will process a minor modification to reduce the parking standards to account for the 6 parking spaces, which is a 3.5% reduction. The project will provide adequate parking for the proposed uses:

Lab Facility Parking Calculation

<u>Use</u>	<u>Area (Sq. Ft.)</u>	<u>Ratio</u>	<u>Number of Spaces</u>
Office	500	1 per 250 square feet	2
Ancillary Industrial	5,926	1 per 750 square feet	8
Processing	32,856	1 per 750 square feet	43
Total Spaces Required			53
Total Spaces Provided			87

Temporary Cultivation Facilities Parking Calculation

<u>Use</u>	<u>Area (Sq. Ft.)</u>	<u>Ratio</u>	<u>Number of Spaces</u>
Cultivation Activities	128,496	1 per 2,500 square feet	51
Ancillary Industrial	49,200	1 per 750 square feet	66
Total Spaces Required			117
Total Spaces Provided			77
<u>Total Spaces Provided</u>			<u>164</u>

Architecture

Similar to previously approved cultivation facilities in the area, the permanent building façade would consist of 3 dimensional forms and architectural elements in the style of desert contemporary architecture. Contrasting accent colors will enhance the architectural features and elements of the proposed structure. The overall architectural character will be that of an attractive, well-maintained industrial building. Temporary building on site will consist of prefabricated steel structures. The TPM project site perimeter will be enclosed with wrought-iron and block wall fencing to enhance visuals and secure perimeter.

Landscaping

Landscaping is proposed around most of the project site, which includes substantial plantings along the street frontage and the parking area. The proposed perimeter landscaping throughout the TPM & CUP project sites will help enhance the visual character of the streetscape in a manner that is compatible with the local desert environment. Landscaping has been designed to balance aesthetic, water use and security objectives. The proposed landscaping will consist of Date Palms, Palo Verde, California Fan Palms, along with low level plantings and wrought iron fencing to visually enhance, protect and blend the cultivation facility into its surroundings while also promoting visibility by law enforcement vehicles from the street.

Lighting

Exterior lighting will be illuminate all exterior doors, signs, walkways, entrances, and parking area, subject to review by the Police Department. Lighting will be oriented downwards and shielded within the property to contain illumination within the project boundary. Lighting will also be reviewed as part of the City's required Regulatory Permit.

Security

Security measures have been considered and incorporated into the project design. The TPM project site will be enclosed within perimeter security fencing. Gated entry/exit drives will control vehicular access to and from the property. Security cameras will be located on all exterior doors, perimeter fencing, and entry gates. A detailed, comprehensive security plan will be reviewed by the City Manager during the Regulatory Permit phase. This will include specific locations and areas of coverage by security cameras; location of audible interior and exterior alarms; location of exterior lighting; fencing; background checks; name and contact information of security company monitoring the site and any additional information required by the City.

Odor Control

Operations involved with the proposed project can generate natural odors associated with plant blossoms. As mandated by Municipal Code Chapter 5.50 and 17.180, all medical marijuana cultivation activities are only allowed in the interior of enclosed structures, facilities, and buildings. To comply with the CUP requirements, the structure must provide the necessary odor control, ventilation and filtration systems for the cultivation and office areas of the structures sufficient to ensure that City requirements for odor control are met. Thus, the project is expected to result in minimal exterior plant odors. In addition, the nearest residential structures to the CUP project site are located approximately 1,500 feet to the north.

Hours of Operation

Hours will be consistent with chapter 5.50.100 of the DHSMC. Medical Marijuana Cultivation Facilities may operate between the hours of 8:00 am and 10:00 pm up to seven days per week. This facility is geared to the cultivation of marijuana and may require staff to be present on premises 24 hours per day. Only authorized staff and delivery personnel will be allowed to enter the premises during the off-hours.

Projected Employment

The applicant has estimated that the CUP project site will employ 102 full time employees.

AGENCY & PUBLIC REVIEW

Public Agency Review

The proposed project was routed to all relevant public agencies and departments for review.

AB 52 Review

The proposed project is subject to review by local Native American Tribal organizations, under Assembly Bill 52 (AB 52) requirements. Per AB 52 requirements, the Community Development Department sent notice to the potentially affected Native American Tribes, requesting their response within 30-days for formal consultation. The request for consultation period began on May 11, 2017 and ended on June 10, 2017, with a formal request for consultation requested by the Soboba Band of Luiseno Indians, staff have contacted the Soboba Tribe to request a meeting.

Public Hearing Notice

The project was noticed to neighboring owners within a 300-foot radius of the project site (on June 29, 2017) and was advertised in the Desert Star on Friday, June 30, 2017 per state noticing requirements. No public comments have been received as of this writing.

DEVELOPMENT AGREEMENT ANALYSIS

The City is requiring all Medical Marijuana Cultivation to process a Development Agreement that incorporates indemnification provisions in favor of the City. The Development Agreement format was prepared by the City Attorney and will be reviewed and approved in final form prior to its presentation to the City Council for approval.

The Desert Hot Springs Municipal Code (17.84 Development Agreements) and State law provide that the City and a developer may enter into a development agreement for the purpose of providing the developer with assurances that their development entitlements will not be subject to revocation, termination or modification because of future changes in the City's zoning, planning and land use regulations. In exchange, the City receives certain benefits in the form of revenue, improvements, etc. that the City could not otherwise legally impose on the project for a variety of reasons. Such reasons include, but are not limited to, (a) the lack of a nexus between a certain condition of approval and the scope of the project's impacts on the environment or surrounding neighborhood or (b) the legal exclusion of a certain use from the imposition of certain fees or taxes. Development agreement authority is essentially one of the only exceptions to the general principle that prohibits cities from contracting away their future police powers. Moreover, development agreement authority has served as an effective means for cities to encourage economic development, which has become increasingly important to some cities in the absence of redevelopment authority.

ENVIRONMENTAL ANALYSIS

In accordance with the provisions of the California Environmental Quality Act ("CEQA"), an Initial Study has been prepared which has determined that development of the proposed medical marijuana testing and cultivation facilities would not have a significant impact on the environment, with the implementation of mitigation measures. A draft Mitigated Negative Declaration (MND) is proposed and contains certain measure for Cultural Resources and Biological Resources. The draft Mitigated Negative Declaration was circulated for a 20-day comment period which began on July 3, 2017 and end on July 22, 2017. The MND is attached for consideration by the Commission, and the City Council will consider certification of a Mitigated Negative Declaration prior to final action on the project.

FISCAL IMPACT

The proposed permanent lab facility will utilize 29,587 square feet for the extraction and processing of medicinal marijuana and temporary structures will utilize 178,680 square feet for the cultivation of medicinal marijuana for a total of 208,267 square feet for medical marijuana uses. This will annually contribute \$25 per square foot for the first 3,000 square feet (**\$75,000**), and then \$10 per square foot for the remaining space (**\$2,052,670**); for a total annual medicinal marijuana cultivation tax of **\$2,127,670** once it opens.

RECOMMENDATION

Staff recommends that the Planning Commission make a favorable recommendation to the City Council for approval of Conditional Use Permit No. 17-17, Development Agreement No. 16-17, and Tentative Parcel Map No. 37158, subject to the Conditions of Approval and including the following findings:

1. *That the proposed use is conditionally permitted within the subject land use district and complies with all of the applicable provisions of this Zoning Ordinance.*

The application is for medical marijuana cultivation and testing facilities which are identified in Section 17.180 of the City of Desert Hot Springs Zoning Ordinance as permitted within any industrial zone which includes the I-L (Light Industrial) zone, subject to approval of a Conditional Use Permit. The project is proposed to be compliant with applicable provisions of the Zoning Ordinance. Conditions of Approval have been prepared and are recommended to assure the proposed use will comply with applicable Zoning Ordinance provisions. Staff recommends this finding.

2. *That the proposed use would not impair the integrity and character of the land use district in which it is to be located.*

Section 17.16.010.B.1 of the Desert Hot Springs Zoning Ordinance identifies the underlying I-L (Light Industrial) zoning district as, "...intended to retain, enhance, and intensify existing and provide for the new development of lighter industrial uses along major transportation routes serving the City." The proposed medical marijuana cultivation facility qualifies as a "lighter industrial operation" in that no heavy manufacturing operations will be conducted on the site. Staff recommends this finding.

3. *That the subject site is physically suitable for the type and intensity of land use being proposed.*

The site is proposed to be developed as a light industrial site with parking, landscape and other features and amenities appropriate to the development. The proposed medical marijuana cultivation and laboratory facilities are physically organized to provide adequate parking, loading and pedestrian circulation for the proposed use with the recommended Conditions of Approval. Consequently, the site is physically suitable for the type and intensity of the proposed facilities. Staff recommends this finding.

4. *That the proposed use is compatible with the land uses presently on the subject property.*

The proposed medical marijuana cultivation and laboratory facilities are a light industrial use with ancillary processing and administration activities, and can be considered similar to other industrial establishments allowed in the I-L (Light Industrial) zone, such as plant nurseries without on-site sales and light manufacturing operations. The proposed building is developed to accommodate the proposed uses and they appear to be able to accommodate a wide variety of industrial uses, if needed. The proposed facilities do not

appear to be outside the range of activities typical for a light industrial site and appears compatible with surrounding light industrial uses. Staff recommends this finding.

5. *That the proposed use would be compatible with existing and future land uses within the general area in which the proposed use is to be located.*

Existing and future land uses within the general area of the proposed medical marijuana facilities are light industrial land uses. Lands to the north, east, south and west are vacant, all surrounding lands are zoned for light industrial development. The site will be a self-contained development with all vehicle circulation needs accommodated on-site. The proposed buildings are located within the center of the subject property and the proposed use is not directly accessed from surrounding land uses. The height and general configuration of the proposed structure is similar to other industrial buildings in the area. Any signage will comply with the Desert Hot Springs Zoning Code. All activities will be contained within the proposed building and the operation will appear as a light industrial use consistent with the intent of the zone. Consequently, the proposed testing, processing, and cultivation facilities are expected to be compatible with existing and future industrial development in the surrounding area. Staff recommends this finding.

6. *That there are adequate provisions for water, sanitation, and public utilities and services to ensure that the proposed use would not be detrimental to public health and safety.*

The subject site will be developed as a light industrial use with all public services and utilities installed prior to occupancy. The proposed testing and cultivation facilities will not create an extraordinary demand for water, sanitation or other public utilities and services that would result in any detriment to public health and safety. Staff recommends this finding.

7. *That there will be adequate provisions for public access to serve the site.*

The subject site will be fully developed with vehicular and pedestrian access, both from public rights-of-way as well as within and throughout the site. The proposed project will not create any additional demand for access than will be provided by the associated parking and drive aisle. Staff recommends this finding.

8. *That there will not be an adverse effect upon desirable neighborhood characteristics.*

Desirable neighborhood characteristics include long-range views from existing properties and business of surrounding mountains, and the future development of light industry on the site and surrounding area. The proposed building's low height (22 feet maximum) is consistent with the development standards of the zoning district and will not impede long-range views. While the proposed project will fully occupy the subject site, surrounding lands available for other businesses will not be limited in their future development by the proposed use. Staff recommends this finding.

9. *That the proposed use is necessary and essential to the community.*

The proposed use can be considered necessary and essential to the community to the extent that it is supported by wholesale customers that cause it to succeed as a local light industrial business. Further, the proposed use must also operate under City regulations and conditions of approval so that only the necessary and essential elements of the business – as determined by the City – are expressed over the life of the business. Staff recommends this finding.

10. *That the proposed use is consistent with applicable goals and policies of the General Plan.*

Staff has identified the following General Plan goals and policies applicable to the application and provides responses to each.

Administration

Goal: Comprehensive and integrated administration and implementation of all elements of the Desert Hot Springs General Plan through consistent and effective policies and programs.

The City has adopted a Zoning Ordinance to implement the General Plan and provide for review and approval of individual development projects. The proposed project will be subject to all requirements of the Conditional Use Permit, as prescribed by the Zoning Ordinance and the adopted Conditions of Approval.

Policy 7: The City shall encourage in-fill development within already urbanized areas of the corporate boundaries of the City, and expansion of new development shall be logically phased and, as appropriate, guided by the development of existing and new Specific Plans.

The proposed project will be located on a vacant property within a partially-developed industrial area, located in the I-L (Light Industrial) zone. All public improvements are either in place or will be constructed prior to occupancy. No specific plan has been adopted for the subject property but staff is currently reviewing one submitted by the applicant..

Policy 8: City shall provide opportunities for review and comment on development proposals through public hearing notices sent to owners of property located at least within 300 feet of development proposal sites.

The project was noticed to neighboring owners within 300 feet of the project site (on June 1, 2017) and in the Desert Star on Friday, June 2, 2017 per state noticing requirements. The Planning Commission will open the public hearing and take public comments and/or testimony on the dais and prior to any action or recommendation to the City Council.

Industrial Land Use

Goal: Lands that provide for the development of non-polluting, energy-related and other clean industrial development that broadens the economic and employment base of the City, and assures compatible integration with other, non-industrial land uses.

The proposed medical marijuana cultivation facility is anticipated to be a non-polluting and clean industrial use that will generate jobs and revenue for the community, thereby broadening the economic and employment base of the City. The operation will be located on a vacant property within a partially-developed industrial area, located in the I-L (Light Industrial) zone, and be developed with all support amenities (parking, trash enclosures, landscaping, etc.) to assure compatible integration with all industrial and non-industrial land uses.

Policy 6: The City shall require adherence to applicable development standards and guidelines to assure aesthetically acceptable industrial developments for all new industrial sites.

The proposed use will be in a new permanent and temporary buildings with new associated site improvements, including parking, vehicle circulation, landscaping and trash enclosures. These improvements have been reviewed for adherence to applicable development standards and guidelines. The proposed architecture and landscape architecture, as conditioned, will result in esthetically acceptable development.

Community Design

Goal 2: Variety of community design, architecture and landscaping compatible with the City's desert setting and surrounding development.

The proposed use will be located in new permanent and temporary buildings with new associated site improvements, including parking, vehicle circulation, landscaping and trash enclosures. These improvements have been reviewed for adherence to applicable development standards and guidelines. The building exterior, site landscaping, fencing and other improvements will be designed with appropriate materials, colors, plant types and other design elements to assure compatibility with the City's desert setting and surrounding development.

Policy 1: Private and public sector development projects shall equally apply City community design standards, thereby protecting the community's scenic viewsheds, providing community cohesion and enhancing the image of Desert Hot Springs as a resort residential community.

The project site is presently vacant, but will be developed and used for light industrial use. The proposed building exterior (including height), site landscaping, fencing and other improvements are will be designed with appropriate materials, colors, plant types and other design elements that protect scenic viewsheds, provide community cohesion and enhance the image of the City.

Policy 9: Signs shall be limited to the minimum size, scale and number needed to provide functional identification and exposure necessary to convey messages, while minimizing impacts on traffic safety, streetscape and scenic viewsheds.

All exterior signs shall be subject to approval under the Desert Hot Springs Zoning Code. The City sign regulations do not permit signs to exceed the height of building eave lines which will result in no impacts on scenic viewsheds.

Policy 10: Lighting shall be limited to the minimum height, number and intensity of fixtures needed to provide security and identification in residential, commercial and industrial development, taking every reasonable measure to preserve the community's night skies.

All exterior lighting shall comply with Section 17.40.170 (Outdoor Lighting Standards) to assure that only the minimum level of lighting necessary to provide the needed security is installed. All proposed exterior lighting shall be reviewed by staff for conformance to the applicable standards. Therefore, the proposed medical marijuana cultivation facility is taking reasonable steps to preserve the night skies.

Economic Development:

Goal 1: A broadly based, healthy and balanced economy that provides a full range of economic and employment opportunities.

The proposed medical marijuana cultivation facility will provide opportunities for new employment and business support services.

Goal 2: Continued growth, which assures the maintenance of revenue, base adequate to support present and future public services and facilities needs.

The establishment of a medical marijuana cultivation facility will provide additional revenues to the City to support present and future public needs.

Policy 11: Make every effort to expedite the processing of development proposals, which address the economic development goals of the community and take the initiative to incubate new programs and projects.

The application for a Conditional Use Permit is required by the Desert Hot Springs Zoning Code to assure compatibility with surrounding land uses and to develop project-specific conditions to assure successful operation in concert with the City's development goals. The application has been processed expeditiously.

Hazardous and Toxic Materials

Goal: The assured safety of City of Desert Hot Springs residents and visitors through the regulation of the manufacture, transport, use and disposal of toxic and hazardous materials.

Any hazardous or toxic materials associated with the proposed operation shall be regulated by the provisions of all applicable law, including the Desert Hot Springs Municipal Code, including Section 5.50 (Medical Marijuana Facilities Regulatory Permit), Section 17.40 (Property Development Standards) and Section 17.180 (Medical Marijuana Facilities Operation and Location).

Fire and Police Protection

Goal: A high level of police and fire protection and service.

The proposed medical marijuana cultivation facility will include security measures, including door locking systems, exterior lighting, camera monitoring and other systems to minimize the impact on police protection services. Fire suppression systems will also be incorporated into the operation to minimize the impact on fire protection service. Consequently, the proposed medical marijuana cultivation facility is not expected to demand a high level of police and fire protection services.

Policy 1: All new and improved developments shall be reviewed for their impact on safety and the provision of police and fire protection services.

The proposed application and associated regulatory permit will include requirements for review of the proposed operation by City police and fire services. Any identified impacts on safety will be addressed by Conditions of Approval or regulatory requirements.

Policy 2

Enforce fire standards and regulations in the course of reviewing building plans and conducting building inspections.

All plans and improvements for interior or exterior building improvements will be subject to review and enforcement under fire codes and regulations. Staff recommends this finding.

11. *That there will not be significant harmful effects upon environmental quality and natural resources.*

The proposed medical marijuana cultivation facility will be located on vacant property currently zoned for light industry. Further, the cultivation facility will operate in accordance with the City's regulations and Conditions of Approval. Based on the draft Mitigated Negative Declaration, no significant adverse or harmful effects on the environment or on any natural resources are anticipated, subject to the implementation of specific mitigation measures and Conditions of Approval. Staff recommends this finding.

12. *That the negative impacts of the proposed use are mitigated and/or a mitigated negative declaration may be filed.*

The proposed project will be operated in accordance with all applicable regulations and Conditions of Approval. A review of the proposed project has identified no negative impacts, subject to the implementation of specific mitigation measures and Conditions of Approval. Staff recommends this finding.

13. *That the proposed location, size, design, and operating characteristics of the proposed use would not be detrimental to the public interests, health, safety, convenience, or welfare of the City.*

The proposed project has been reviewed by City departments and other public agencies for any potential detrimental effects on public interests, health, safety, convenience or welfare of the City. Any potential concerns have been addressed by recommended Conditions of Approval, and no unresolved concerns remain. Staff recommends this finding.

DEVELOPMENT AGREEMENT NO. 16-17

1. *That the property proposed to be subject to the agreement is not less than 1 acre in size*

The site has a total gross area of 11.94 acres.

2. *That the application is made on forms approved, and contains all information required, by the Director;*

The applicant has submitted a draft development agreement on the City's template for review.

3. *That the Development Agreement contains provisions that: specify the duration of the agreement; specified the permitted uses of the property; specified the density or intensity of use(s); set forth the maximum height and size of the proposed structure; set forth provision, if any for reservation or dedication of land for public purpose; provision not permitting protection from a future increase in development fees; provisions for a tiered amendment review procedure; and provisions for a health and safety exception such as "compelling public necessity"*

All required provisions are incorporated into the draft agreement.
