Have you ever attended a City Commission Meeting? ☐ No ☒ Yes If yes, list which commissions and approximately how many.

CCAC & Planning approximately a dozen meetings

Describe your knowledge of the functions, regulations and procedures of the Commission (1st choice) on which you would like to serve:

To evaluate building codes and ordinances, review the General Plan and establish new zoning and variances with the current and future needs of the city. With Desert Hot Springs growth and economic potential these are vitally important matters in order to ensure the financial and operational success of the city.

What specific skills, attitudes, and experience do you think you have that will enhance the work of the Commission?

My commercial development finance experience subjected me to all of the above requirements when submitting projects to cities and counties for development approval. I established a pro-active attitude while learning to understand many of the unforeseen challenges that new development and current development changes can cause for a city or county. I believe I will bring a positive understanding to the challenges that Desert Hot Springs faces in the coming years.

What specific issues or problems face the commission? Do you have suggestions to address these issues or problems?

Finding ways to establish safety for our residents is an ongoing concern whether it's sidewalks, landscaping, infrastructure, lighting, traffic control or commercial or industrial development. Dealing with the public and developers in an expedient and professional manner should always be a top priority.

There are no single answers to any of the above issues but it is vital that the commission gather all of the facts and complete adequate due diligence as it reviews each matter before making recommendations to the City Council.

Appointed Commissioners may be required to submit a Fair Political Practices Act, Statement of Economic Interests (pursuant to Government Code §87200 and/or Desert Hot Springs Municipal Code Section §2.20.050)
